## About AWA

Based in Essex, but operating nation wide, we provide an efficient and tailored service to businesses and individuals across the UK. Our complete range of products enables us to supply a range of sectors successfully, such as construction and civils, events and festivals, transmission and renewables to agriculture and private functions. All Weather Access installation teams are efficient, timely and professional, ensuring the products and services are deployed rapidly and positioned correctly.

# What we do

## Our services include:

- Site surveys where required
- Haulage to and from site
- Installation and de-rig
- Hire or purchase products
- Dry hire if preferred
- Cleaning panels after hire period
- Contract cleaning

We can offer a flexible approach according to your requirements, so please call to discuss.

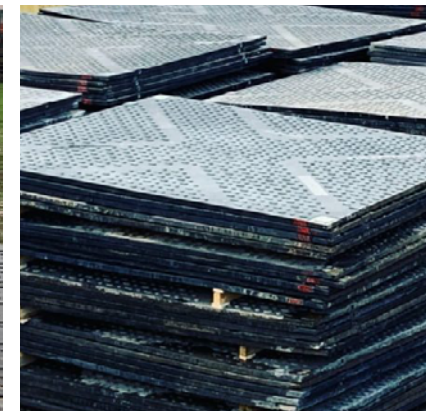

# Heavy Duty Tufftrak

Tufftrak is the ultimate heavy duty trackway panel for temporary roadways and working areas ideal for heavy plant and machinery, to allow ingress to inaccessible places or to avoid working areas becoming too wet and unusable.

## Key Features

- Equivalent performance to aluminium panels, without such security risks or costs
  - Lower transport cost than other comparable mats
  - Non-conductive – ideal for use on transmission projects
  - Protects against severe rutting and eco damage to ground and sensitive sites
  - Connection options for different terrain & equipment
  - A reversible low-profile surface for drilling rigs, work pads, depot areas and helipads
  - Solid one-piece construction, 38mm of solid plastic ensures rigidity to carry heavy loads
- Anti-slip surface

## Medium duty

### Duradeck

Duradeck composite mats are robust enough to handle loads up to 80 tonnes, yet flexible enough that they follow the contours of the terrain. These medium duty mats have a specialised pedestrian friendly surface on one side and a rugged textured surface on the other for vehicles.

### Trakmat

Trakmats are excellent medium duty trackway panels, useful for a range of applications. Strong enough to spread the weight of vehicles, grippy enough for pedestrian walking, whilst light enough to be moved by hand, a great all-rounder.

### Euromat

Euromat have a rugged raised surface profile for excellent traction for light to medium weight vehicles. Easily installed by hand and spreads vehicles weight well.

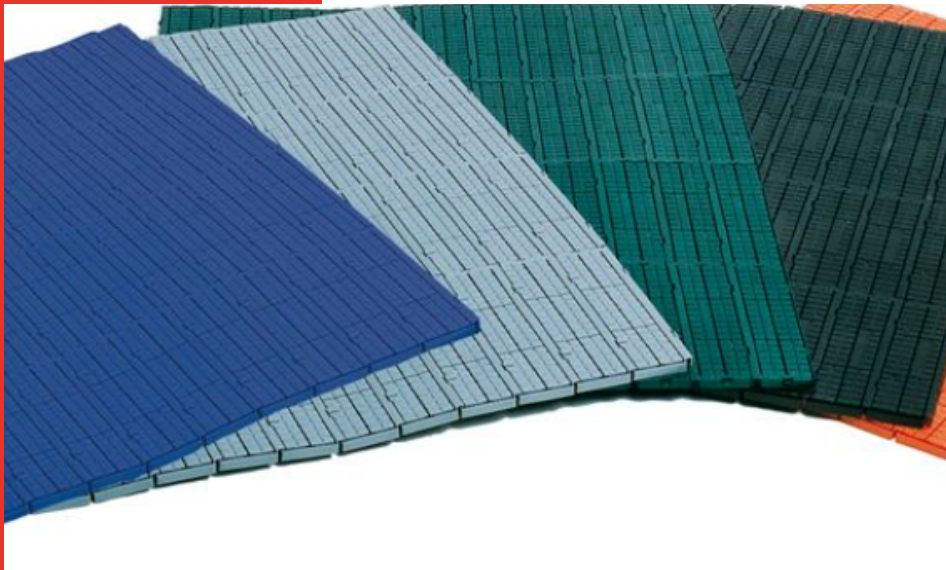

## Pedestrian

### Ultradeck

Ultradeck creates rigid and uniform temporary pedestrian flooring for high-end events and large-scale gatherings where protecting the ground, the turf or the guests is of upmost importance. Ultradeck can be rapidly deployed requiring no special tools or skills, and leaves a temporary floor, which is clean, smart and professional.

### Portapath

Portapath pedestrian flooring is an aesthetically pleasing walkway product, suitable for events of all size; from a wedding in the back garden up to corporate events, festivals and entertainment areas, where it is essential to keep staff and guests clear of dirt.

## Permenant

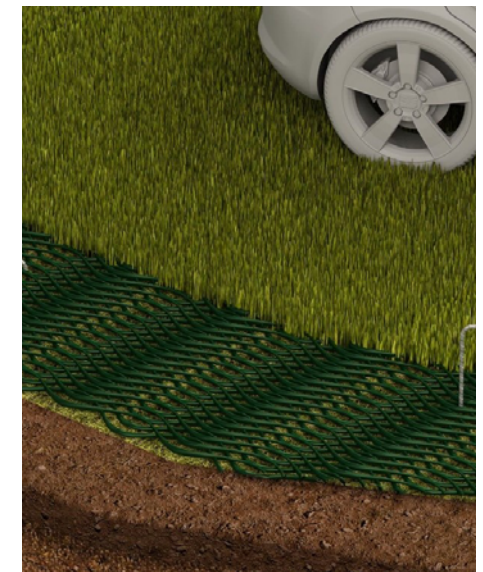

### Geogrid

Geogrid creates robust permanent or semi-permanent ground protection with the ability to have grass, gravel or sand finish depending on the site, to leave the site looking neat and tidy or natural with grass. Due to the nature of the product Geogrid is only available to purchase (not to hire).

### Grassmesh

Grassmesh is a semi permeant or permeant roll out plastic mesh that uses the combined strength of the grass intertwined with the extruded plastic to create a strong reinforced surface. It allows the grass to grow through the mesh, maintaining the visually aesthetic appeal of the grassy area.

# Storage

## Stillage

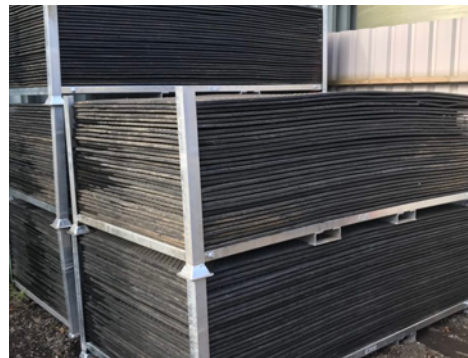

Purpose built stillages to securely store and stack trackway panels of all shapes and sizes. We have a range of sizes available but can produce custom specifications upon request.

## Key Features

- Quality steel used only
- Manufactured in UK
- Secure and safe for transportation
- and storage
- Stackable
- Storage compartments available

## Typical Applications

- Storage
- Transportation
- Securing loads
- Variety of panel size possible
